

## Immunization Coverage Under the Affordable Care Act

The Patient Protection and Affordable Care Act (PPACA, or ACA) requires non-grandfathered health plans to cover certain preventive services at no cost share (no copay, coinsurance, or deductible) for eligible members. This list of preventive services includes certain immunizations. Plans may choose to cover a core list of immunizations (i.e., flu, pneumonia, shingles) or an expanded list, which would also include vaccinations to prevent diseases such as hepatitis, chicken pox, and human papillomavirus (HPV). To find out whether your health plan is subject to ACA requirements and whether your health plan covers a core and/or expanded list of immunizations, call Serve You Rx customer service at **800-759-3203**.

Coverage of immunizations at no cost share requires:

- The plan to be non-grandfathered
- The vaccine to be administered at a network retail pharmacy
- The member to provide their member ID card to the pharmacy at the time of service

Certain coverage restrictions may apply to the immunization program, such as age limitations or limitations on number and frequency of fills. These restrictions are in accordance with the recommended immunization schedule issued by the Centers for Disease Control and Prevention (CDC) Advisory Committee on Immunization Practices (ACIP). Additionally, not all of the vaccines listed in the table below are available at all network pharmacies. Contact your local network pharmacy to confirm which vaccines are available.

Below is a listing of the vaccines included in the core immunization program and additional vaccines included in the expanded immunization program.
